DETAILED ACTION

Response to Amendment

1. Claims **14** and **16** are pending in the instant application. While there are no amendments to the claims there is no harm in indicating they are accepted and there is no new matter previously entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Please change the title of the invention from "CIRCUIT AND METHODS TO IMPROVE THE OPERATION OF SOI DEVICES"

to

-- METHODS TO IMPROVE THE OPERATION OF SOI DEVICES --

Application/Control Number: 09/588,351 Page 3

Art Unit: 2815

Allowable Subject Matter

3. Claims 14 and 16 are allowed.

4. The following is an examiner's statement of reasons for allowance. The applicant's method differed from typical such methods in that the body of the SOI device is discharged to a potential "prior to reading the output of the SOI device" and "just prior to accessing the memory circuit for reading or writing data". This is distinct from the standard bias generator that is constantly connected to the body of a SOI device. The invention is somewhat similar to the retention time guardband testing done on DRAM devices where the array n-well or p-well is externally biased during testing to shift device thresholds up or down via the "body effect" or to enhance cell to well leakage. However, the above testing method does not anticipate the claims since this method is not dynamic (on the fly so to speak) and similar to simply providing a non-standard voltage bias generator to the devices (i.e. the tester forces the bias long before the test pattern is run so that the test is done after all voltages are stabilized). The reference that most closely anticipated the allowed claims was Gitlin et al. 5,880,620.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
